

Your communication. Your data. Your control.

## POWERFUL ALTERNATIVE

The new Collax Groupware Suite offers a powerful alternative to Microsoft Exchange. With native, 100% compatible Outlook support (MAPI), it brings emails, calendars, contacts, and tasks together in a centralized and familiar environment.

Ideal for small and medium-sized businesses, public authorities, and medical institutions with high demands for data protection, efficiency, and digital sovereignty.

## DATA SOVEREIGNTY THROUGH OPEN SOURCE

Collax relies on open source – ideal for IT administrators and data protection officers. This ensures that organizations retain full control over their data and meet privacy requirements such as the GDPR.

Unlike Microsoft, Collax stores all data locally within the organization. Thanks to full Outlook compatibility (MAPI, EAS), your data remains accessible anytime, anywhere in the world.

## CENTRAL PLATFORM FOR EMAIL, CALENDAR, TASKS, AND CONTACTS

The comprehensive CGS groupware combines all the tools needed for efficient collaboration – anytime and anywhere:

- Email communication
- Calendar and appointment management (incl. group calendars and meeting coordination)
- Contact management
- Task and project management
- File and document sharing
- Notes and shared workspaces
- Mobile device and remote access
- Permissions and user management

## BENEFITS

### The Modern Alternative to Microsoft Exchange

- 100% Outlook compatibility
- Full data sovereignty thanks to open source
- Global access on all devices – mobile, desktop, or web
- Easy integration into existing IT infrastructures
- ActiveSync and Outlook support
- Active Directory integration
- Spam and virus protection

## THE ALL-IN-ONE SOLUTION

### Server, Backup, and Central User Management from a Single Source

We turn the Collax Groupware Suite into more than just a powerful communication solution: we integrate it into a complete server with centralized backup, a unified graphical user interface (GUI), and seamless user management via Active Directory. This creates a comprehensive, secure, and easy-to-administer platform for your entire IT infrastructure.

## SEAMLESS MIGRATION

The Collax Groupware Suite is the smart choice for anyone seeking greater control over their digital communication. The solution integrates easily into existing IT infrastructures – even in heterogeneous system environments.

## SYSTEM REQUIREMENTS

**Minimum Specifications:** • 64-bit processor (x86)  
• Installation medium (USB stick or ISO image) • Hard drive: 50 GB • One network interface • RAM: 4 GB • VGA-compatible graphics card (required only during installation) • Virtual machine compatible

Your communication. Your data. Your control.

## Groupware
